Acronyms

APR	OIG Audit and Program Review Section
ARO	Affordability Requirements Ordinance
CACC	Chicago Animal Care and Control
CDOT	Chicago Department of Transportation
CFD	Chicago Fire Department
COLS	City-Owned Land System
CPD	Chicago Police Department
CPL	Chicago Public Library
DFSS	Department of Family and Support Services
DHR	Department of Human Resources
DOB	Department of Buildings
DOH	Department of Housing
DPD	Department of Planning and Development
DSS	Department of Streets and Sanitation
GAGAS	Government Auditing Standards
IL OSHA	Illinois Department of Labor's Division of Occupational Safety and Health
IPS	Information Public Sector
IT	Information Technology
MCC	Municipal Code of Chicago
OBM	Office of Budget and Management
OEMC	Office of Emergency Management and Communications
OIG	Office of Inspector General
OPSA	Office of Public Safety Administration
PPP	Paycheck Protection Program
ZBA	Zoning Board of Appeals

I | Mission

The City of Chicago Office of Inspector General (OIG) is an independent, nonpartisan oversight agency whose mission is to promote economy, efficiency, effectiveness, and integrity in the administration of programs and operation of City government.

The OIG Audit and Program Review (APR) section supports the OIG mission by conducting independent, objective analysis and evaluation of municipal programs and operations, issuing public reports, and making recommendations to strengthen and improve the delivery of public services.

APR conducts performance audits of Chicago municipal programs and operations in accordance with generally accepted government auditing standards (GAGAS or “Yellow Book,” 2018 revision) established by the United States Government Accountability Office. As defined in GAGAS 1.21,

Performance audits provide objective analysis, findings, and conclusions to assist management and those charged with governance and oversight with, among other things, improving program performance and operations, reducing costs, facilitating decision making by parties responsible for overseeing or initiating corrective action, and contributing to public accountability.

In addition to performance audits, APR may also generate non-audit work such as advisories, notifications, and descriptions of programs.

APR’s role is separate from, but complements, the work performed by the OIG Investigations and Public Safety sections. Investigations primarily examines allegations of individual misconduct or wrongdoing, and Public Safety focuses on the Police Department, Civilian Office of Police Accountability, and the Police Board, endeavoring to promote public safety, protect civil liberties and civil rights, and ensure the accountability of the police force. APR undertakes projects designed to help the City maximize the effectiveness and efficiency of programs and processes. APR is also distinct from the OIG Compliance Section, which performs legally mandated reviews of the City’s hiring and employment practices to ensure compliance with the City’s various hiring Plans.

II | Purpose of the Annual Plan

The purpose of the APR Annual Plan is to identify potential projects for the upcoming fiscal year. Projects are selected based on OIG's prioritization criteria, as described below.

A | Subject to Change

The Annual Plan is a guiding document that is subject to change; it does not prohibit APR from setting new priorities or initiating different projects over the course of the year. Circumstances that arise during the year may prompt OIG to undertake new, higher priority projects or reduce the priority of a planned project. Some topics on the Annual Plan may be deferred to following years. In addition, a project on the Annual Plan that originally begins as an audit may instead be completed as an OIG advisory, department notification, or other non-audit report, or terminated if OIG determines that further work will not bring substantial benefit to the City or is not cost-effective for OIG.

B | Departmental Action

OIG encourages City departments to proactively assess any program included in the Plan and to alert OIG to any corrective action taken in advance of and/or during an APR performance audit. Such action will not necessarily deter APR from auditing the program, but the audit will assess and report on any proactive and promptly reactive measures the department has taken.

C | Process

The Annual Plan is drafted in consultation with the Inspector General, senior OIG staff, and APR staff, with final approval by the Inspector General. OIG publishes a draft of the Annual Plan for public comment each year, and then reviews, updates, and publishes the final Plan with consideration of the public comments.

III | Selection of Topics for Inclusion in the Annual Plan

A | Topic Source

OIG gathers potential audit topics from a variety of sources, including intakes received from the public; suggestions from City officials, employees, and stakeholders; past OIG reports; OIG investigations; OIG staff knowledge; other governments' performance audits, audited financial statements, internal audits, and risk assessments; new City initiatives; program performance targets and results; public hearings and proceedings; and public source information, including media, professional, and academic reports and publications.

OIG encourages the public to submit suggestions anytime through the OIG website: igchicago.org/intakeform/.

B | Prioritization Criteria

OIG considers several factors in selecting projects for the Annual Plan, including preliminary risk assessments of the programs or services involved in potential new project topics; the unique value a potential project might bring to City stakeholders; and the availability of APR resources, taking into account resources required to conduct follow-ups on past reports.

C | Risk Assessment

A risk factor is an observable and/or measurable indicator of conditions or events that could adversely affect an organization, absent effective internal controls. APR's assessment of topics is based on risk factors reflecting the nature and potential vulnerabilities of departments, programs, and vendors. APR considers a variety of risk factors, such as,

- Resources used to deliver service
 - Size (in dollars budgeted) of department/program
 - Number of staff working in department/program
- Public interest/impact
 - Critical to the City's mission or core service provision
 - Affects public health or safety
 - Affects vulnerable populations
 - Affects equitable provision and distribution of City services and support
- Number of residents, employees, and/or businesses affected/served
 - Quality/quantity of service provision
 - Customer satisfaction
- Compliance with laws, regulations, or policies
- Volume, type, and dollar amount of financial transactions
- Quality of internal control systems, including,
 - Existence of robust operational policies and procedures
 - Existence and use of performance metrics
- Underfunded mandate or mismatch between program objectives and available resources

APR assesses risk based on discussions with departments and leadership, information requested from departments, information obtained from prior OIG work, publicly available information, and additional research. In some cases, OIG selects a project because there is a preliminary indication of specific program vulnerabilities. In other cases, OIG selects a project where there is little or no indication of program vulnerabilities, but the public and governmental leadership would benefit from independent evaluation and assurance that the program is working well.

D | OIG Role and Value Added

OIG seeks to add unique value arising from its role as the City's independent oversight agency by prioritizing APR projects that,

- analyze performance of governmental operations and programs where analysis requires data and information not available to external entities;
- analyze governmental operations and programs where no recent independent analysis exists;
- develop knowledge of the operation of municipal programs and services; and/or
- analyze narrow, obscure, or complex aspects of municipal operations that receive little attention (in addition to broad scope topics).

In addition, OIG strives to ensure that the selection of projects provides coverage across the full spectrum of governmental functions and services.

E | Follow-Up on Past APR Reports

APR evaluates each completed audit six months after publication to determine whether, when, and how to conduct follow-up. Factors considered in determining what, if any, follow-up action to take include the nature of the original findings and recommendations, changes in management or staff structure, and external circumstances affecting the department. For example, APR may decide to postpone follow-up for an additional six months, conduct another full audit with complete re-testing, or simply request and evaluate documentation of corrective actions from management.

Follow-up reports are an essential part of the oversight process because they enable OIG to evaluate the actions taken by a department or agency to address problems identified in the original audit report. For that reason, they take the highest priority when planning the activities of APR personnel.

F | Available Staff Resources

The number, experience, and specific expertise of staff available to APR affect the selection of project topics and their scope. APR will not undertake projects unless OIG has the required competencies available among its personnel or can procure them from external sources. APR will request assistance from other OIG staff when their specialized expertise (e.g., legal or data analysis) may benefit a project, and will adhere to all GAGAS requirements for the use of such internal specialists.

To maximize their utility, performance audits must be timely. Unexpected delays caused by an auditee, such as slow responses to APR requests, or problems with the quality of program data, are noted as findings or limitations in published audit reports. Proper planning requires the Deputy

Inspector General and Chief Performance Analysts to assign adequate staff—or, if necessary, reduce audit scope—to ensure timely completion of all projects.

IV | 2024 New Projects

As projects are completed and staff become available, APR reviews the topics on the Annual Plan and conducts additional research prior to launch. (“Launch” is the official opening of an audit with a department.) The final decision to launch a project requires approval by the Inspector General on a just-in-time basis, because circumstances affecting the decision of whether or when to launch a specific project are expected to change throughout the year.

APR groups the 22 potential project topics listed below into 5 broad categories corresponding with the functions and departments presented in the City’s Annual Appropriation Ordinance, Summary E. The topics are not ranked. The numbers below are provided solely for ease of identification. Each topic listed includes,

Background and Rationale: Background on and relevance of the topic.

Potential Objectives: Potential questions the project will seek to answer. APR refines the objectives after obtaining more information about the topic from the department.

There are four projects on the 2023 Plan that have not been launched and will not be carried over to the 2024 Plan because they were considered lower priority than other projects. These projects are:

- Department of Cultural Affairs and Special Events Chicago Film Office
- Chicago Department of Public Health’s Enforcement of Prohibition on Illegal Dumping
- Department of Family & Support Services’ (DFSS) Gender-Based Violence and Human Trafficking Reduction
- Food Equity Council and Agenda

A| City Development and Regulatory

1. Zoning Board of Appeals (ZBA) Explainer

Background and Rationale: Property owners must receive approval from the ZBA to develop a property in a way that does not comply with the Chicago Zoning Ordinance. The Ordinance limits such variations to situations in which strict compliance would create specific difficulties or hardships. Through an initial review of meeting minutes, it appears the ZBA approves most variation requests. However, publicly available documentation does not appear to demonstrate the specific hardships defined by the ordinance.

Furthermore, the variation application process is legally complex and requires numerous fees, creating the risk that it will be restricted to those with the resources to navigate the process. This explainer will describe ZBA’s decision-making process and provide transparency regarding the compliance of variations with the reasons allowed in the Municipal Code of Chicago (MCC).

- Potential Objectives:
- To describe the ZBA's process of reviewing and approving property developments that vary from the Chicago Zoning Ordinance.
 - To describe how ZBA documents variation decisions with supporting approval criteria, evidence, hardships, and/or other review factors.

2. Chicago Animal Care and Control (CACC) Operations

Background and Rationale: CACC plays a critical role in ensuring the humane care of Chicago's animals through sheltering, pet placement, education, and animal law enforcement; it receives 40,000 calls a year to 311 and provides in-house medical care to more than 16,000 animals per year. This audit would determine whether CACC's enforcement procedures align with national animal care and control best practices. It would also determine whether CACC's medical and drug supplies are controlled and protected from loss and whether a documented plan exists to ensure CACC operations can continue in the event of a disaster.

- Potential Objectives:
- Do CACC's enforcement policies and procedures align with National Animal Care and Control Association Guidelines?
 - Does CACC's inventory management policies ensure medical supplies, including drugs, are controlled and protected from loss?
 - Does CACC have a disaster plan that aligns with best practices?

3. City-Owned Land Management

Background and Rationale: In recent years the Department of Planning and Development (DPD) has developed an inventory of city-owned land for sale, known as the City-Owned Land System (COLS). COLS contains some additional records of land and facilities managed by other departments. However, the City does not maintain a comprehensive inventory of the land it owns and no department is tasked with maintaining this information. Without a full inventory, the City cannot ensure efficient enforcement of rules (such as illegal dumping, parking, and weed cutting) or that its land is used and valued appropriately. Community members cannot hold the City responsible for maintaining the land it owns if they cannot identify the City as the owner.

- Potential Objectives:
- Has the City defined and implemented procedures to develop and maintain an accurate and comprehensive inventory of land assets?
 - How will the City ensure that the inventory is accessible to City departments that need it?

4. Department of Buildings (DOB) Complex Demolitions

Background and Rationale: In April 2020, the implosion of an industrial smokestack at the former Crawford coal-fired Generating Power Plant covered the Little Village neighborhood in dust and pollution. This event highlighted the City's shortcomings in interdepartmental coordination.¹ The following year, City Council updated the municipal code to define these types of potentially risky or large demolitions as "complex" demolitions, which have more requirements than ordinary demolitions. DOB issues permits for complex demolitions. This audit will examine whether DOB ensures the necessary steps outlined for complex demolitions are followed, including safety plans and approvals required by other city departments.

Potential Objectives:

- Does DOB ensure applications for complex demolitions are complete, including safety plans and approvals required by other City departments?
- Does DOB conduct the required pre-permit inspections for complex demolitions?
- Does DOB consistently identify demolitions that qualify as complex?

5. Inclusionary Housing Task Force Report Implementation

Background and Rationale: In September 2020, the Department of Housing (DOH) published the Inclusionary Housing Task Force Staff Report to inform updates of the City's primary inclusionary housing tool, the Affordable Requirement Ordinance (ARO). The ARO requires new and rehabbed residential developments to include a percentage of affordable units, aiming to ensure that "private development creates affordable housing in communities where the market and public policy have failed to do so." The report included nine recommendations to strengthen inclusionary housing policies in Chicago. To provide transparency to the residents of Chicago, this audit will assess what changes DOH has made to inclusionary housing policies to address the Report's recommendations.

Potential Objective: Has DOH implemented corrective actions to address the recommendations from the Inclusionary Housing Task Force Staff Report?

B| Community Services

6. Chicago Public Library (CPL) Social Services Staff Development

Background and Rationale: The Chicago Public Library has served the city for nearly 150 years, often as the public's first interaction with City services. In recent years, CPL has seen increases in the community's need for library-based social services, access to CPL's social workers, and digital resources. Additionally, alderpeople have

¹ In March 2023, the OIG published an advisory noting that, in its recent inquiries, it had found a number of areas of inefficiency and ineffectiveness in City government attributable to poor or inadequate coordination among City departments. City of Chicago Office of Inspector General, "Advisory Concerning Interdepartmental Coordination and the City's Administrative Officer Position," March 21, 2023, <https://igchicago.org/publications/advisory-on-interdepartmental-coordination-and-the-citys-administrative-officer-position/>.

asked about the library's response to some of the city's most vulnerable populations, including at-risk children and people experiencing homelessness. As part of its 2020-2024 Strategic Plan, CPL set a number of goals to train staff to meet these expanding needs, with particular focus on accessibility, diversity and inclusion, and trauma-informed collective care. This audit would assess CPL's progress towards achieving these staff development goals as described in its 2020-2024 Strategic Plan.

- Potential Objectives:
- Have CPL staff received trauma-informed, collective-care training and does CPL have a process to ensure new employees receive the training?
 - What progress has CPL made to embed diversity, equity, and inclusion principles in all aspects of its operations?
 - Has CPL created the "technology competency framework" and does it ensure staff can fully support the technology needs of members of the community?
 - Are CPL staff trained and qualified to respond to the growing social needs of the communities they serve?
 - Does CPL's workforce reflect the communities in which they work?

7. DFSS City Services for Older Adults

Background and Rationale: In 2019, the City envisioned Chicago as an age-friendly city where "all residents have a full capacity to lead long and healthy lives."² Chicago's regional population is aging, with an estimated 2 million people likely to be above the age of 65 by 2050. DFSS's Senior Services division "provides adults ages 60 and older with access to services to remain healthy, safe, and independent" through in-home and caregiver services and social, educational, and recreational activities at 21 regional and satellite centers operated by delegate agencies. This audit would assess the operations of the Senior Services division and their provision of services to Chicago's older adults.

- Potential Objectives:
- To determine the City's goals regarding service provision to older adults.
 - Does the City track performance toward its goals and make operational adjustments to improve performance?
 - Does DFSS follow its Active Contract Management strategy and review its contracts with delegate agencies for performance outcomes and outputs?

² Chicago Department of Public Health, "Healthy Chicago Databook: Older Adult Health," 2, accessed September 13, 2023, https://www.chicago.gov/content/dam/city/depts/cdph/statistics_and_reports/CCHE-001_OlderAdults_Databook_r5a.pdf.

8. DFSS Domestic Violence Help Line

Background and Rationale: Domestic and gender-based violence remain a pernicious issue in Chicago's communities. The Network recently reported that, "A snapshot of Chicago Police Department data shows domestic violence-related homicides [...] have increased in the last three years. This increase in lethality disproportionately affects communities of color. Contacts to [the Chicago Police Department (CPD)] related to domestic violence continue on a downward trend [...] suggesting] that non-police response systems are needed to intervene for survivors who do not feel police are the right tool to meet their needs."³ The City of Chicago's Domestic Violence Help Line—(877) 863-6338—is a 24-hour confidential number for domestic violence victims, concerned parties, helping professionals, and perpetrators. Volunteers at the help line connect almost 3,000 callers a month to services and information in over 140 languages.⁴

DFSS contracts with a third party to operate the help line and is responsible for general oversight and dissemination of help line data. Because the operation of the City's help line is wholly dependent on a contractor, this audit would examine the City's oversight of that third party and its contractual obligations.

Potential Objectives:

- Does the City ensure domestic violence victims receive the care and services they need by:
 - ensuring contract requirements align with best practices related to the operation of a domestic violence help line;
 - ensuring the contractor meets the performance metrics established in its contract, and uses the metrics, in collaboration with the City, to inform its operations; and
 - ensuring it meets the contractual obligations regarding help line infrastructure and translation services?

³ The Network, "Measuring Safety: Gender-Based Violence in Illinois (Data Report 2022)," accessed October 24, 2023, https://the-network.org/wp-content/uploads/2023/08/23_08_14_MeasuringSafety_2022_Digital-compressed.pdf.

⁴ City of Chicago, "Help on Domestic Violence," accessed September 13, 2023, https://www.chicago.gov/city/en/depts/fss/provdrs/dom_violence/svcs/domestic_violencehelpline.html.

9. DFSS Community Service Centers

Background and Rationale:	<p>DFSS operates six Community Service Centers across Chicago. These centers provide a whole-of-government approach to help vulnerable individuals and families access essential resources such as food, shelter, and clothing. Additional resources provided by the centers include, but are not limited to, domestic violence support, financial assistance programs, and job training and placement services for the formally incarcerated. Given the array of services offered, it is essential that Community Service Centers coordinate with other City departments and social service providers. Furthermore, because these centers are public-facing entities that connect residents to essential human services, it is critical to the people served, and to broad public confidence in City government, that DFSS is responsive to the communities it supports.</p>
Potential Objectives:	<ul style="list-style-type: none"> • To describe how DFSS Community Service Centers coordinate with City departments, delegate agencies, and external stakeholders to support the needs of the communities they serve. • Has DFSS defined specific social service outcome goals of its Community Service Centers? • Does DFSS measure progress towards the outcome goals and determine whether the whole-of-government approach benefits the community at the level intended? • How does DFSS ensure intended program beneficiaries actually receive the services?

C| Finance and Administration

10. DOF's Management of Outstanding Debt

Background and Rationale:	<p>It has been recently reported that debtors owe the City more than \$6.4 billion in unpaid fees, fines, and other debts that have accumulated since 1990. City officials have reportedly indicated that a small group of individuals are responsible for a substantial portion of the debt, but that it could not provide a full list of debtors because of litigation and administrative burden based on the volume of debt transactions.</p>
Potential Objectives:	<ul style="list-style-type: none"> • To determine whether the City can identify all debts and debtors. • To determine whether current City practices prevent or reduce the risk of unpaid and delinquent fines, fees, and other debts.

11. Swiping Policy Enforcement

Background and Rationale:	<p>The City's swiping policy was recommended by an absenteeism task force which examined "the extent and causes of absenteeism among City employees." The policy was to address absenteeism and provide "needed public accountability." It explicitly requires that every City employee "swipe in and out each day," and that "single swiping is no longer permitted regardless of past practice, position, title, or function." Exceptions to the rule require the approval of both DOF and the Office of Budget and Management (OBM). The policy also defines approved swipe locations and prohibits employees from commuting to and from home "on the clock." OIG investigations have substantiated time fraud by City employees. This audit seeks to determine whether the City enforces the swiping policy, reducing the risk of employee time fraud.</p>
Potential Objectives:	<ul style="list-style-type: none"> • Do DOF, OBM, and other City departments enforce the swiping policy? • Has DOF and OBM approved, as exceptions to the policy, those employees who do not comply with the policy? • Do departments monitor time and attendance reports to ensure employees swipe in and out at their assigned location? • Since the swiping policy was instituted, have there been any changes implemented or considered?

12. Mayoral Boards and Commissions

Background and Rationale:	<p>Chicago's municipal government includes over 100 boards and commissions with members appointed by the mayor: for example, Special Service Area commissions, advisory groups such as the Board of Health, and regulatory bodies like the Zoning Board of Appeals and the Emergency Telephone System Fund Board.⁵</p>
---------------------------	---

The composition and responsibilities of these groups are governed by various ordinances, laws, and executive orders, but detailed information about their budgets and operations is not always easily available. Limited transparency creates concerns around conflict of interest, given that appointees are City officials subject to Ethics Ordinance restrictions on their political and business activities.⁶

This project would provide transparency into the functions of mayoral boards and commissions, quantify their use of taxpayer dollars and City resources, and evaluate their compliance with relevant regulations.

⁵ City of Chicago, "Office of the Mayor – Boards and Commissions," accessed September 8, 2023, <https://webapps1.chicago.gov/moboco/>.

⁶ City of Chicago, "The Ethics and Open Meetings Guide for Board and Commission Members," 2, August 2019, accessed September 8, 2023, https://webapps1.chicago.gov/moboco/resources/pdf/Ethics_Booklet.pdf.

- Potential Objectives:
- What are the operating budgets and activities of mayoral boards and commissions?
 - Are mayoral boards and commissions constituted according to the relevant requirements?
 - Are appointed members of boards and commissions in compliance with the disclosure requirements of the City's Ethics Ordinance?

13. Earmarked Funds

- Background and Rationale:
- Earmarked funds are monies set aside by City Council for special purposes such as homelessness prevention, the emergency telephone system, and public art. These funds are typically raised through City fees and surcharges, and in many cases, MCC requires them to be kept separately from the City's general expense fund ("the corporate fund").

During the course of a recent audit, OIG discovered that an earmarked fund required by MCC did not exist within the City accounting system and that the earmarked money had instead been deposited into the corporate fund. In response to the audit, DOF retroactively created and balanced the fund. This raised procedural questions about how earmarked funds are managed after being established by City Council. This audit will determine whether earmarked taxpayer dollars are collected and spent as intended.

- Potential Objectives:
- What is the process to ensure that special funds required by the MCC are created in the City's accounting system?
 - Have the funds and separate accounts required to exist by the MCC been created and are they actively used?
 - What procedures ensure that the creation and use of special funds is transparent to the public?

14. Outside Employment Policy

- Background and Rationale:
- The City of Chicago Personnel Rules require all City employees who seek outside employment to "request in writing with her or his department head for permission."⁷ OIG is aware that some departments do not require employees to obtain permission. Enforcement of this rule is an essential tool for the City to ensure an employee's outside employment would not involve a conflict of interest, interfere with the performance of duties, or conflict with their assigned working hours. Furthermore, knowledge of outside employment could aid the efficient investigation of fraud allegations, such as Paycheck Protection Program (PPP) fraud.

- Potential Objective:
- Does the City ensure each department enforces the Outside Employment policy within the Personnel Rules?

⁷ City of Chicago Department of Human Resources, "Personnel Rules," September 10, 2014, 59, accessed September 7, 2023, https://www.chicago.gov/content/dam/city/depts/dhr/supp_info/HRpolicies/2014_PERSONNEL_RULES-FINAL_2014_v3.pdf.

D| Infrastructure

15. Advisory on Citywide Implementation of Hansen and Information Public Sector (IPS) Software

Background and Rationale: Outdated and inefficient software directly impacts the City's ability to provide services to members of the community. The City first implemented a software program for inspections, permitting, and licensing (Hansen 7) in 2001. It began updating this software in 2009 and, in the 14 years since, has paid approximately \$80 million to its parent company. In response to past OIG projects, Departments have frequently asserted that their reliance on the outdated software prevents them from implementing recommendations to improve service delivery and data collection.

The City has been engaged in an enterprise-wide Information Technology (IT) modernization effort since 2021. While some departments are using a more recent version of the software (IPS), others – including the Chicago Fire and Building Departments – are still using Hansen 7 to conduct core functions. IT applications with outdated capabilities, uneven implementation, and inability to communicate with other systems have deep impacts on the government's ability to operate efficiently, effectively, and economically. Inefficiencies and waste caused by the use of these systems impact the city's financial resources, credibility, and quality of service to the public and other entities that engage with city services.

Potential Objectives:

- To describe OIG's past observations about Hansen and IPS.
- To describe how the technological deficiencies reported by departments impact the services provided to Chicagoans.

16. AIS City Cybersecurity Incident Response Plans

Background and Rationale: IT security is widely recognized as a high-risk area in government, and local governments are increasingly the target of cybersecurity and ransomware attacks. According to the Federal Bureau of Investigation, in 2022 government facilities ranked in the top 3 infrastructure sectors victimized by ransomware and Illinois ranked among the top 10 states by both number of victims and dollars. Cybersecurity breaches harm government's ability to provide services and can impact regulatory compliance, financial assets, human health and safety, and public trust and confidence. IT incidents impact internal users of City government systems, anyone attempting to access city services electronically, and taxpayers when the government has to divert resources to recover from an attack. This audit would examine the robustness of the City's cybersecurity incident response plans.

Potential Objective:

- Does the City of Chicago's cybersecurity incident response plan align with best practices?

17. Department of Streets and Sanitation (DSS) Blue Cart Recycling

Background and Rationale:	DSS is responsible for the Blue Cart Recycling program, which entails collecting waste from residential properties with four units or less. The Blue Cart Recycling program services over 620,000 residential units and, in 2022, cost \$26.5 million. In April 2021, the City contracted with a private waste hauler to collect residential recycling in four of Chicago's six recycling regions. DSS crews service the remaining regions. In 2021, the City published a Waste Strategy that recommended improvement to the Blue Cart Recycling program. This audit will evaluate whether DSS has implemented the recommended improvements and whether the fee for garbage collection covers DSS's costs to provide the service.
Potential Objectives:	<ul style="list-style-type: none"> • Has DSS implemented the improvements to the Blue Cart Recycling program, as recommended within the Waste Strategy? • Does the fee for garbage collection cover DSS's costs to provide the service? • Do Blue Cart Service Areas handled by the private hauler experience higher capture rates for recyclable material than zones handled by DSS crews?

18. CDOT Street Resurfacing and Maintenance

Background and Rationale:	In a 2015 audit, OIG found that the Chicago Department of Transportation's (CDOT) pavement management program did not meet federal guidelines and lacked sufficient street condition data, relying instead on constituent complaints and visual inspections. The audit also found that the City could save \$4.6 million annually by reallocating money from resurfacing to preventive maintenance. Poor street conditions continue to concern roadway users. This audit will re-examine the City's pavement management program to determine whether improvements have been made to increase the efficiency and effectiveness of the program.
Potential Objective:	<ul style="list-style-type: none"> • Does CDOT manage streets in a cost-effective way that extends pavement life?

E| Public Safety

Note: OIG's Public Safety Section conducts inspections, evaluations, and reviews of City police and police accountability programs, operations, and policies.

19. Office of Public Safety Administration (OPSA) Civilianization Outcomes

Background and Rationale:	Civilianization is the process where administrative positions held by sworn or uniformed officers are converted into positions that are held by non-sworn or non-uniformed individuals. Civilianization presents opportunities for cost savings and increased operational efficiencies. Past OIG reports identified missed opportunities to civilianize positions in the police and fire departments. In 2019, the City realigned administrative functions of CPD, the Chicago Fire Department (CFD), and the Office of Emergency Management and Communications (OEMC)
---------------------------	--

under OPSA. This project will determine what progress OPSA has made toward achieving the goal of moving sworn officers and uniform fire personnel from administrative roles and to the field.

- Potential Objective:
- Have CPD and CFD maximized opportunities for civilianizing positions?

20. CFD Overtime Management

Background and Rationale: Despite budgeting \$211 million for overtime between 2017 and 2022, CFD spent over \$404 million on overtime across those six years. While some use of overtime is expected, excessive or inequitably distributed overtime may indicate suboptimal personnel management. This audit will evaluate CFD's overtime practices.

- Potential Objectives:
- Does CFD allocate staff in a manner that minimizes overtime?
 - Does CFD maintain and enforce policies that ensure appropriate and equitable assignment of overtime to staff?

21. OEMC Workforce Management

Background and Rationale: During recent OEMC budget hearings, office management has described difficulties in filling vacancies for 911 dispatchers. They explained an increased rate of vacancies due to a large cohort of employees reaching retirement age. Management of the existing workforce is the first step to ensuring the Office maintains an effective public safety response. This audit would review and evaluate OEMC's procedures for workforce management including staffing, scheduling, stress management, and training.

- Potential Objectives:
- Does OEMC's staffing and scheduling policies meet best practices?
 - Does OEMC ensure new and veteran 911 dispatchers obtain the training required by best practices, including Critical Incident Stress Management?
 - Does OEMC monitor staff to ensure they maintain adequate performance?

22. CFD's Compliance with IL OSHA's Occupational Safety and Health Compliance Guide for Fire Departments

Background and Rationale: The Illinois Department of Labor's Division of Occupational Safety and Health (IL OSHA) enforces regulations designed to prevent injury and loss of life in fire department operations. IL OSHA investigated the recent death of a firefighter and inspected CFD operations related to the incident. It concluded that while CFD largely operated according to established procedures, "certain procedures were not followed." IL OSHA cited CFD with four violations, one of which was a repeat violation. It also made 15 recommendations to ensure compliance and reduce the risk of future injuries or deaths.

Potential
Objectives:

- Has CFD incorporated corrective actions regarding IL OSHA's recommendations, including those related to "medical evaluation[s] to determine the employee's ability to use a respirator" and the standard that firefighters "enter together, stay together, [and] exit together" with no exceptions?
- Does CFD ensure operations adhere to IL OSHA's Occupational Safety and Health Compliance Guide for Fire Departments?⁸
